November 29, 2010

Dear Jim and ReBath staff,

After three months with my new tub surround, I couldn't be more pleased!! I thank you **all** each time I step into my shower.

~~It took me a week or so to remember not to reach up for the shower curtain rod to steady myself but now it feels natural to reach for the new grab bar. The bar under the window is set higher than it was previously and this has proven to be a positive change also as it allows me access it while standing.~~

I had thought the window curtain would be a lost cause since I could not reinstall the curtain rod. **However.....**using Command Strip hooks on the tub surround at the top of the window and purchasing an expandable rod I was able to reinstall the window curtain like it had never been taken down.

At first I was upset at the new (longer) grab bar which necessitated installment of the utility holder at the front of the tub. I had expected a bar half that size in order to allow installation of the holder at the back. However even that has proven to be a positive! It is the perfect place to hang the tub mat to drip!! And I can reach the soap and other items just fine at the front.

So.....Happy Holidays to all of you from one VERY satisfied customer. I was dubious at the start but knew the surround was necessary. You have made me a true believer in ReBath! Thank you so much.

Sincerely,

Ellen Foster
